What role does the state have over national development within an increasingly globalized economy? Moreover, how do we conceive 'nationality' during periods of rapid economic and social change spurred on by globalization? By examining tourism in the Republic of Ireland over the past 20 years, Michael Clancy addresses these questions of national identity formation, as well as providing a detailed understanding of the political economy of tourism and development. He explores tourism's role in the 'Celtic Tiger' phenomenon and uses tourism as a lens for observing national identity formation in a period of rapid change.

"The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." – The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. Despite the current recession, the frequency of second home ownership is still surprisingly high throughout the western world. While the UK and Ireland previously had lower occurrences of multiple dwellings compared to the rest of Europe, they are quickly catching up with a current surge in the ownership of second homes. The recent MP expenses scandal in the UK has also drawn attention to the prevalence of second homes (or more) within the middle classes, and the fact that the concept is becoming increasingly popular. Chris Paris uses this text to address the reasons behind why second homes are becoming more popular, both within the usual domicile of the individuals, and in international locations. The socioeconomic factors and historical contexts of homes in cultures across the world are fundamental to explaining the choices in transnational home ownership, and Paris' case studies and comparisons between additional homes in Europe, Australia, America and Asia expand upon the motivation for people to own a second home. Affluence, Mobility and Second Home Ownership draws together debates on gentrification, globalisation, consumerism, environmental factors and investment to provide a balanced look at the pros, and cons, of second home ownership, and what implications it has for the future. An ideal text for students studying geography, urbanism and planning, this book is also of interest to individuals interested in the changing ways in which we make choices on our places of residence.

In his blistering new novel, Cormac McCarthy returns to the Texas-Mexico border, setting of his famed Border Trilogy. The time is our own, when rustlers have given way to drug-runners and small towns have become free-fire zones. One day, a good old boy named Llewellyn Moss finds a pickup truck surrounded by a bodyguard of dead men. A load of heroin and two million dollars in cash are still in the back. When Moss takes the money, he sets off a chain reaction of catastrophic violence that not even the law—in the person of aging, disillusioned Sheriff Bell—can contain.As Moss tries to evade his pursuers—in particular a mysterious mastermind who flips coins for human lives—McCarthy simultaneously strips down the American crime novel and broadens its concerns to encompass themes as ancient as the Bible and as bloodily contemporary as this morning's headlines. No Country for Old Men is a triumph.
