Mick WalkerES Italian Racing Motorcycles Mick Walker. This much enlarged and heavily revised edition looks at both major and minor players throughout Italy who have produced racing motorcycles of significant interest. Among the legendary Italian motorcycles included in this volume are Aermacchi, FB Mondial, Bimota, Moto Guzzi, Ducati, Garelli, Bianchi,Laverda, Gilera, MV Agusta and Parilla. Well done! Sftbd., 8 1/4"x 11", 256 pgs., 683 b&w ill., 86 color.

One-hundred years of Harley-Davidson is often reduced to a tale of a machines. Equally fascinating, and often overlooked, are the men and women behind the machines. The Harley and Davidson founder, the engineers, the racers, the designers, the dealers, the flesh-and-blood heroes made the company and the bikes the success they are today. This book was written in cooperation with the Motorcycle Hall of Fame Museum to accompany an exhibit that opened in 2003. After a brief introduction, the book is divided into three sections; 1. Heroes of H-D; 2. Exhibition catalog; 3. H-D historical overview.

Take a full-throttle tour through more than a century of Harley-Davidson history with this definitive e-guide. The Ultimate Harley-Davidson tells the story of the world's greatest motorcycle make--from its origins in a backyard shed to the international company it is today, more than 100 years later. From the early bikes and their key innovations to the v-rods and sports bikes of recent years, it is the complete e-guide for lovers of this American classic. Gloriously illustrated gallery spreads showcase more than 70 of the best-loved Harleys ever created, drawing out their defining features. Spectacular close-ups of key engines explain how the classic Harleys ran, while an updated catalog of every production model provides technical data and key specs for each bike. Whether you're an easy rider or born to be wild--or just mad about motorcycles--there is only one Harley-Davidson, and this is the ebook for you.

This is the first volume of the two-volume autobiography of Colin Seeley, a famed British motorcycle racer and builder. The book is full of anecdotes, escapades, personalities and memorable descriptions on and off the track which give a fantastic insight into the racing and technical achievements over three great decades in motorcycling history.

This book is an account of the companies and individuals, who have played a major part in the design and advancement of motorcycle frame (chassis) performance. These independent companies began to spring up in the early postwar years, when motorcycle racing began to take place again. Due to the lack of available factory machines and the urge to improve performance of the now aged equipment, riders began to build their own frames around whatever engines were available. Success brought recognition, and people were soon wanting to buy winning machines, so fledgling companies began to spring up to satisfy the growing demand for custom chassis. Some of these companies soon began to grow, and others appeared in various European countries over the next few years. The state-of-the-art hand built frames were becoming a must for the discerning road bike rider, and so the independent motorcycle frame makers were beginning to put some designs into production, and a thriving business was beginning to emerge. In later years, with such a large choice of factory engines from around the world, the successful independent chassis manufacturers went from strength to strength and some are now producing highly prized road bikes, whilst building one-off machines as required. As the years have passed, one or two of the independent companies have disappeared, but in many cases their machines have become very collectable classics. The companies still thriving today, as well as producing modern machines with a wide range of engine options, are finding considerable business rebuilding and maintaining machines built in the earlier years. Some of the pioneer builders have become household names to the motorcycle fraternity, and those written about in this book include: Nico Bakker (The Netherlands), Bimota (Italy), Dresda Autos (United Kingdom), Egli (Switzerland), Harris Performance Products (United Kingdom), Hejira racing (United Kingdom), Magni (Italy), Maxton Engineering (United Kingdom), P&M Motorcycles (United Kingdom), Quasar (United Kingdom), Rickman UK (United Kingdom), Colin Seeley Racing (United Kingdom), Segale (Italy) and Spondon Engineering (United Kingdom). This book charts the history of these innovative companies with full specifications for many chassis, and is extensively illustrated throughout. A must for any motorcycle enthusiast, and a valuable reference for the trade.

There have been plenty of books published about Italian motorcycles, and a few covering the café racer genre, but none has covered the evolution of the Italian sportsbike into the Italian café racer - until now. Coming from a nation with a great motorcycle racing heritage, Italian motorcycles have, unsurprisingly, always had a sporting flair. This book lifts the lid on the growing trend of custom Italian café conversions, illustrated in detail with stunning images of select sporting, racing, and café Italian motorcycles. Italian Café Racers celebrates stunning Italian bikes from all over the globe. From the old to the modern, from horizontal-singles to inline sixes, this book reveals these stylish machines in all their innovative glory. Whether you're an entusiasta, a follower of the café racer culture, or simply appreciate beautiful bikes, this book is guaranteed to interest and inspire ... see the 'café' side of Italian bikes.

This book examines the classic period of Grand Prix racing from 1960 to 1969, and the men and machines involved. A fascinating exploration of the last decade of 'traditional' Grand Prix racing, before significant events changed the nature of the sport forever.
