Contract killer Toby O'Dare accepts a seraph's offer to leave his violent existence in order to save lives, and finds himself transported to thirteenth-century England and challenged to defend falsely accused Jewish citizens.

Contract killer Toby O'Dare accepts a seraph's offer to leave his violent existence in order to save lives, and finds himself transported to thirteenth-century England and challenged to defend falsely accused Jewish citizens.

Een Amerikaanse huurmoordenaar wordt door een Engel naar het 13e eeuw Engeland gestuurd waar hij een joods echtpaar helpt dat wordt beschuldigd van moord op hun eigen dochter. Mystieke thriller.

Anne Rice returns to the mesmerizing storytelling that has captivated readers for more than three decades with this new novel -- the first book in a new series called "Songs of the Seraphim." *Angel Time* is a dark, suspenseful novel about angels, reluctant assassins and a journey of redemption. Toby O'Dare -- a.k.a. Lucky the Fox -- has fallen far from grace. He is a contract killer who carries out violence whenever and wherever he is told, a soulless soul who takes orders from someone he calls "The Right Man." When a mysterious stranger comes into Lucky's nightmarish world and offers him a chance to save lives rather than destroy them, Lucky seizes the opportunity to escape the darkness. He is lifted in (angel) time and carried back through the ages to the primitive and treacherous world of thirteenth-century England, where Jews live an uneasy existence. He begins a journey that leads him from the medieval villages of England to the cities of London and Paris as his quest becomes a story of danger and flight, loyalty and betrayal, selflessness and love.

Dolly Parton's success as a performer and pop culture phenomenon has overshadowed her achievements as a songwriter. But she sees herself as a songwriter first, and with good reason. Parton's compositions like "I Will Always Love You" and "Jolene" have become American standards with an impact far beyond country music. Lydia R. Hamessley's expert analysis and Parton's characteristically straightforward input inform this comprehensive look at the process, influences, and themes that have shaped the superstar's songwriting artistry. Hamessley reveals how Parton's loving, hardscrabble childhood in the Smoky Mountains provided the musical language, rhythms, and memories of old-time music that resonate in so many of her songs. Hamessley further provides an understanding of how Parton combines her cultural and musical heritage with an artisan's sense of craft and design to compose eloquent, painfully honest, and gripping songs about women's lives, poverty, heartbreak, inspiration, and love. Filled with insights on hit songs and less familiar gems, *Unlikely Angel* covers the full arc of Dolly Parton's career and offers an unprecedented look at the creative force behind the image.

Anne Rice's magnificent *Songs of the Seraphim* series continues with a lyrical and haunting new novel of angels and assassins set in dark and dangerous worlds — in our time and in centuries past. Toby O'Dare, former government assassin, is summoned by the angel Malchiah to fifteenth-century Rome — the city of Michelangelo and Raphael, of Leo X and the Holy Inquisition — to solve a terrible crime of poisoning and to uncover the secrets of an earthbound restless spirit, a diabolical dybbuk. Toby is plunged into this rich age as a lutist sent to charm and calm this troublesome spirit. In the fullness of the high Italian Renaissance, Toby soon discovers himself in the midst of dark plots and counterplots, surrounded by a still darker and more dangerous threat as the veil of ecclesiastical terror closes in around him. And as he once again embarks on a powerful journey of atonement, he is reconnected with his own past, with matters light and dark, fierce and tender, with the promise of salvation and with a deeper and richer vision of love.

Jud Block grew up in Texas in the 80s and 90s; heard the siren songs of Waylon, Townes, Billy Joe, Kris, and the Scottish poetry of Stuart Adamson, which afflicted him with a love of music at an early age; lacking any vestige of a Puritan work ethic, he learned to play bass and lurked around the Arlington/Fort Worth punk rock scene with a few bands (Elysian Fields/Death Rabbis) until it became clear that fashion had usurped the music's message, and he turned in his Doc Martens; around this time he bought his first acoustic guitar and learned five chords, which he later discovered was two chords too many, but he figured if he ever decided to go into prog rock, he's covered; after leaving Texas, he didn't play in a band, or solo, again until the outskirts of the new millennium, when he took on bass duties for an all-original blues-rock

band (Kenny's New Car) in Orlando, Florida; in 2001, he moved to Charlotte, NC, and formed Cattletruck terrorizing the staid mindset of the financial district for nearly 10 years and released two CDs, Bourbon and Black Crepe and Branches from the Hangin' Tree, until that beast ran off the road and was left to become one with the Earth in some backwoods pasture; In 2009, he released his first solo CD, Empty Chamber Grace, a solo acoustic collection of dark, gallows humor-infused tales heavily influenced by Townes Van Zandt, Brent Best, Eric Taylor, Tom Russell, Charles Bukowski, and Larry Brown; and in 2012, he released his second CD, Barroom Gravity, which draws from the same influences as the first, but with a bit more flesh on the bones . In 2013, he returned to his home state of Texas armed only with an acoustic guitar and a stash of incisive lyrics in search of a few folks who'll take the time to listen.

In this book we look at the history of the South African Nuclear Weapons Program, long denied but always winked about, an open secret to many although the details were always vague with rumours of Israeli assistance in designing the bombs. In fact, the Israeli input was negligible as the South African nuclear weapons worked in an entirely unique way, yielding about what the Hiroshima bomb did and considered "sufficient" as a deterrent against a Soviet Union originated and supported conventional attack. This attack almost came to be in 1988 - 1989 via Angola into what was then South West Africa and today Namibia. Masses of conventional forces were gathered, and plans were made - in history the same as the attack on South Vietnam by North Vietnamese Forces the decade before. History always repeats itself. A brilliant South African "Maskirovka" from the Chief of Staff in Pretoria stopped the planned invasion as well as the very public mobilising order of 400,000 men from the Army Reserves. South Africa also had the means to deliver nuclear bombs accurately, all discussed in this book and may even have done so, although, we don't know. It is one of the big "ifs" in history. As said, the invasion never took place and in no small way due to the Battle of Cuito Cuanavale which is often written about in GMJ Books. It was the largest tank battle in Africa since the Second World War and South African Forces won hands down. It is beyond maddening to the author that no Western "Expert" today knows that in 1978, South Africa produced working nuclear weapons. They either don't know, forgot history, or are incompetent, or more probably, both. Just before Mr. Mandela took office as the newly democratically elected president, the atomic devices were handed over to the US Government for dismantling. That act was until now the only time in the world where a country willingly got rid of its nuclear arsenal. Everyone applauded. Yet, the means to manufacture such weapons did not disappear with the weapons, something no one in the West realises. If a place like Iran wants a nuclear weapon, they merely need to ask the South Africans that have the know-how and proven capability to produce them in record time. It is old technology. In Code Name Angel we deal with nuclear weapons and the risk of such weapons in the hands of terrorists using them against the West. You should not doubt that terrorists will use nuclear devices if they have them - they stated their intentions to do so many times in the past. The normal rules of MAD, retaliation, do not apply to them. There is no reason to doubt that they would flatten a Western city if given the opportunity and such opportunities can be created easily enough as this book explains. Description: Spymaster extraordinaire, Angelique Dawson and her team must recover lost or roguery manufactured South African nukes on their way to Iran or Al-Qaeda or both for all we know. The warheads are escorted by Zimbabwean Intelligence operatives in cahoots with Iranian Intelligence. This was one of the first major Egg Breaker operations that never made the newspapers and took place mostly in southern Mozambique, the chosen exfiltration point for the weapons. Major Geoffrey Foxtrot, under command of his handler, Angelique Dawson, later his wife and soul, tracks the weapons down in a combined operation with Mossad Agents but that is only the first step. Disarming the devices is another story as Angelique insists on doing so herself, plus the Zimbabweans are also around to prevent the bombs from being intercepted in the first place. A clash between the two groups is unavoidable. If you wish to read about Covert and Special Forces Operations in sub-Saharan Africa, the GMJ Books are the place to start. You will learn about covert operations, Special Forces techniques, and military history not known outside the select few. Code Name Angel is the 7th book of the popular GMJ Series.

Do angels really smell like candy? Since we haven't really smelled one, we can think that they do! After all, coloring is an imaginative experience that lets you see and experience adventures in your mind. When you color, you experiment on colors, lines, shapes and perspectives. This paves the way for pretend play. Color today!
