Past, present and future finally collide in this fascinating, action-packed, enlightening account of our long-forgotten ancient past catching up with its impending Earth-shattering future! Following annihilation of their own world after a cosmic collision between Triton and Pluto, which sent Venus spiralling into a near-Sun orbit, the Venusian's set up the Atlantis Empire on Earth. However, following genetic enhancement of humanity, the cosmopolitan harmony was catastrophically interrupted by invading Reptilian forces from the Red Dwarf Star system which passed by our solar system 70K years ago. This sparked a 30K Cold War, also ending in global destruction. Finally, the past catches up with the present and following an unexpected encounter between brothers and a Venusian in waters off the Welsh coast, a highly publicised series of astonishing events unravels, captured instantly by social media. Then humanity faces the fact it really is not alone in the Universe, let alone on Earth!

Part one of two books comprising of the complete works of lyrics and poems I have written over the past 5 or 6 years (to 2016). Some of the lyrics have been changed or updated from the original, many others are unchanged. I cannot write music so cannot claim to call them songs. All the words written are my personal opinion and not meant to influence peoples beliefs or views, so please do not take them as a personal insult.I write to relieve the daily grind of everyday life and am influenced by what I see and hear. A simple sentence or word can give me an idea. I write lyrics very quickly in a matter of minutes which may not be an ideal way of writing, but it suits me.I hope you enjoy what you read.

Anyone who assumes that a car is simply a means to get from point A to point B, or who even thinks that they know what a car is, should read this book. Profoundly shaped by culture, the car gives rise to a wide range of emotions, from guilt about the environment in the UK to aboriginal concerns with car corpses, to struggles to keep the creatures alive with everything but the proper spare parts in West Africa. Cars and their landscapes prove central to human life from its most intimate to the widest sense of global crisis, and are capable of inspiring epic passions. From road rage in Western Europe to the struggles of cab driving in Africa to the emergence of Black identity in the US, this book examines the essential humanity of the car, which includes the jealousies, gender differences, fears and moralities that cars give rise to. Firmly grounded in detailed ethnographic and historical scholarship, this is the first book to provide an informed sense of cars as one of the most familiar and significant forms of material culture.

The Holocaust has bequeathed to contemporary society a cultural lexicon of intensely powerful symbols, a vocabulary of remembrance that we draw on to comprehend the otherwise incomprehensible horror of the Shoah. Engagingly written and illustrated with more than forty black-and-white images, Holocaust Icons probes the history and memory of four of these symbolic relics left in the Holocaust's wake. Jewish studies scholar Oren Stier offers in this volume new insight into symbols and the symbol-making process, as he traces the lives and afterlives of certain remnants of the Holocaust and their ongoing impact. Stier focuses in particular on four icons: the railway cars that carried Jews to their deaths, symbolizing the mechanics of murder; the Arbeit Macht Frei ("work makes you free") sign over the entrance to Auschwitz, pointing to the insidious logic of the camp system; the number six million that represents an approximation of the number of Jews killed as well as mass murder more generally; and the persona of Anne Frank, associated with victimization. Stier shows how and why these icons-an object, a phrase, a number, and a person-have come to stand in for the Holocaust: where they came from and how they have been used and reproduced; how they are presently at risk from a variety of threats such as commodification; and what the future holds for the memory of the Shoah. In illuminating these icons of the Holocaust, Stier offers valuable new perspective on one of the defining events of the twentieth century. He helps readers understand not only the Holocaust but also the profound nature of historical memory itself.
