## HOW TO REMOVE AND REPLACE VALVETRONIC MOTOR ON BMW E90 E91 ...

The BMW N42 is a DOHC four-cylinder petrol engine which replaced the BMW M43 and was produced from 2001-2004.. The N42 serves as the basis for the smaller N40 engine (which does not have valvetronic).. The N42B18 won the 1.4-1.8 L category of the International Engine of the Year awards for 2001.. In 2004, the N42 was replaced by the BMW N46 four-cylinder engine.

## BMW N42 - Wikipedia

MILVs start with new BMW OEM valvetronic support parts, or used, seasoned BMW OEM support parts when available. These parts are modified with custom CNC mill machine work. Six different machining steps are done to each stock part to transform stock supports into a ' MILVs '

## Home - BimmerMILVs

BMW engine codes are designed to provide a lot of information about the engine design and technology in a short amount of space. Standard BMW engines use a "M", "N", or "B" code. BMW M GmbH models use an "S" code. The official motorsport Race engines use a "P" code. Click on an image below to view the breakdown for each engine family.
