Raising a bright and happy child starts during pregnancy and early infancy, when small changes can have a big impact on brain development. By taking advantage of this golden window of opportunity--when millions of new brain cells are formed every single day--you can help support your child's IQ, language development, memory, attention span, and emotional regulation. Importantly, the same strategies that nurture these cognitive abilities can also help reduce the odds of autism and ADHD, conditions that now impact 1 in 10 children. Brain Health from Birth is your guide to this new scientific frontier, explaining which key nutrients may be missing from your prenatal supplement, how to reduce the odds of preterm birth, what to look for in a formula, how to support your baby's microbiome, and much more. With contributions from leading obstetricians and pediatricians, science writer Rebecca Fett (author of the bestselling fertility book *It Starts with the Egg*) brings you practical advice you can start applying today, to help your baby thrive.

A NEW YORK TIMES NOTABLE BOOK OF 2020 From award-winning higher education journalist and New York Times bestselling author Jeffrey Selingo comes a revealing look from inside the admissions office—one that identifies surprising strategies that will aid in the college search. Getting into a top-ranked college has never seemed more impossible, with acceptance rates at some elite universities dipping into the single digits. In *Who Gets In and Why*, journalist and higher education expert Jeffrey Selingo dispels entrenched notions of how to compete and win at the admissions game, and reveals that teenagers and parents have much to gain by broadening their notion of what qualifies as a “good college.” Hint: it’s not all about the

sticker on the car window. Selingo, who was embedded in three different admissions offices—a selective private university, a leading liberal arts college, and a flagship public campus—closely observed gatekeepers as they made their often agonizing and sometimes life-changing decisions. He also followed select students and their parents, and he traveled around the country meeting with high school counselors, marketers, behind-the-scenes consultants, and college rankers. While many have long believed that admissions is merit-based, rewarding the best students, *Who Gets In and Why* presents a more complicated truth, showing that “who gets in” is frequently more about the college’s agenda than the applicant. In a world where thousands of equally qualified students vie for a fixed number of spots at elite institutions, admissions officers often make split-second decisions based on a variety of factors—like diversity, money, and, ultimately, whether a student will enroll if accepted. One of the most insightful books ever about “getting in” and what higher education has become, *Who Gets In and Why* not only provides an usually intimate look at how admissions decisions get made, but guides prospective students on how to honestly assess their strengths and match with the schools that will best serve their interests.
