This edited volume bridges the gap between basic and applied science in understanding the nature and treatment of psychiatric disorders and mental health problems. Topics such as brain imaging, physiological indices of emotion, cognitive enhancement strategies, neuropsychological and cognitive training, and related techniques as tools for increasing our understanding of anxiety, depression, addictions, schizophrenia, ADHD, and other disorders are emphasized. Mental health professionals will learn how to integrate a neurocognitive perspective into their clinical research and practice of psychotherapy.

Covers quality of content, types of articles, manuscript structure, writing style, grammar, quotations, tables, footnotes, proofreading, and journal policies.
