IBM Cognos BI supports both authenticated and anonymous user access. In this step, if the anonymous access is disabled, then the SDK application must logon using a namespace ID, a user name and its associated password. The namespace ID is the value of the Namespace ID field in IBM Cognos Configuration.

It's a set of code libraries, ie. jars or dlls. The SDK comes in three different programming languages: java, C#, and visual basic. It's not a studio or plugin or executable program. The Cognos SDK occupies a strange position in the Cognos development ecosystem. It's a solution to a number of problems. People working with Cognos usually have a database or business analysis background, not programming, and often are not familiar with the term 'SDK'.
