The Technician's Radio Receiver Handbook is an invaluable tool for anyone involved in the technologies of wireless, cellular telephone, telecommunications, avionics, and other forms of electronic communication using radio waves. The market demand for and use of wireless and telecommunication technology has increased dramatically over the past decade, leaving many technicians and other communications professionals with the need for accurate information on how the newest equipment works and how to fix any problems that arise. Joe Carr, a notable author in the amateur radio and communications markets, explains both the new and old technologies, the science behind the scenes, as well as troubleshooting techniques not found in any other book. The book will also have a companion website including helpful calculation software, customizable spreadsheets, and much more. Written for technicians and hands-on practitioners in clear, easy-to-read text with many detailed illustrations Contains information on cutting-edge receiver equipment as well as the most popular types used today in a variety of markets Destined to be a constant reference and superb training guide for anyone interested in communications technology

For anyone who has been fascinated by the regal splendour of Rajasthan, this book is a must-buy. From details about the princely pastime of shikar to a visual tour of the gorgeous Shekhawati homes, Royal Rajasthan encapsulates the essence of a state steeped in traditions of art, architecture and commerce. The reader is transported into the interiors of breathtaking palaces and forts that have now been converted into heritage hotels, and into the polo grounds where the royals showed off their mastery over this sport. Whats more, this brilliantly conceptualised book also contains stunning aerial photographs of Rajasthan and rare archival images from the private collections of princely states that add a hitherto undreamt of dimension to the narrative.

Learn how to check out an investment sales pitch for legitimacy; recognize warning signs of fraud, types of fraud, and what to know about "senior" specialists and advisers.

The Highway Safety Manual (HSM) is a resource that provides safety knowledge and tools in a useful form to facilitate improved decision making based on safety performance. The focus of the HSM is to provide quantitative information for decision making. The HSM assembles currently available information and methodologies on measuring, estimating and evaluating roadways in terms of crash frequency (number of crashes per year) and crash severity (level of injuries due to crashes). The HSM presents tools and methodologies for consideration of "safety" across the range of highway activities: planning, programming, project development, construction, operations, and maintenance. The purpose of this is to convey present knowledge regarding highway safety information for use by a broad array of transportation professionals--P. xxiii.

Provides an overall introduction to the welding process, illustrating most of the common equipment and work techniques for both the home and shop welding.

Growing from tiny tadpoles to massive master jumpers, frogs and their life cycles are fascinating. How far can frogs jump? Why do their eggs look slimy? Answer these questions and many more in this illustrated introduction to amphibians. With her signature bright, well-labeled diagrams and simple text, Gail Gibbons introduces the habitat and life cycles of frogs and gives an overview of common frog behaviors. Important biology vocabulary is introduced, defined, and reinforced with kid-friendly language and clear illustrations--plus a page of intriguing frog trivia and clear diagrams that show how frogs are different from toads. Bonus material is included about the unique role frogs play in the environment.

A cool guide to help kids develop robots and electronics About This Book Get clearly-written code with descriptions and comments that explain each code section The book comes with separate code files, one entire program at a time, as well as many diagrams and separate downloadable files that contain colored photos explaining steps in the book Kids can build multiple projects during the course of the book; by the end, they will have working projects of their own Who This Book is For This book is for children aged 9 and up, and their parents, who may or may not have a technical background. This book is tailored around the central idea of introducing electronics as a fun and a curiosity-inducing exercise. This book can act as a bonding exercise between parent and child over a single weekend. What You Will Learn Write simple programs using variables, functions, loops, arrays, and libraries Set up the Arduino and understand its internal functioning Get to grips with connections in electronics and arrive at ways to connect various components yourself Delve into various sensors and their selection and build your own sensor Unravel the concept of resistors and capacitors along with understanding the physics of electronics Become an inventor through interactive exercises (such as making a friend happy with a proximity sensor, and giving "life" to a plant) In Detail The mission of this book is to integrate technology with the tools that children already use for crafts so that they feel that the technology is an extension of their playtime. We use coding, sensors, and micro-controllers integrated with art and craft supplies, origami, and Playdough. There are 10 fun-filled chapters that talk to children directly, and give clear instructions for non-technical parents too. We use Arduino as the controller of choice due to its easy availability and large community. By the end of the book, children will comfortably be able to set up their Arduino, read and understand code, manipulate code, and ultimately write their own code for projects. They will also be able to use basic sensors and know how components connect to each other. All the learning takes place with lots of colorful pictures and the circuits are neatly presented using wiring. Style and approach This book will show you the glamour of common and easily available sensors, so that kids and parents waste no time searching for parts. We provide simple yet fun projects with step-by-step instructions that make it easy to get hands-on.

The wildly inventive debut collection of stories by the Oscar-nominated star of The Social Network. "Hilarious . . . It's a hoot" (People, The Best New Books). Jesse Eisenberg, known for his iconic film roles, his regular pieces in the New Yorker and two critically acclaimed plays, proves himself "a deeply original comic voice" in these 28 stories" about the funniness, sadness, and strangeness of everyday life and they really made me laugh" (Rox Chast). Moving from contemporary LA to the dorm rooms of an American college to ancient Pompeii, Eisenberg throws the reader into a universe of social misfits, reimagined scenes from history, and ridiculous overreactions; a college freshman forced to live with a roommate is stunned when one of her ramen packets goes missing ("She didn't have 'one' of my ramens. She had a chicken ramen."); Alexander Graham Bell has teething problems with his invention ("I've been calling Mabel all day, she doesn't pick up! Yes, of course I dialed the right number-2!"); and in the title story, a precocious and privileged nine-year-old boy finds himself in the uncomfortable position as an amateur restaurant critic. Featuring illustrations by award-winning cartoonist Jean Jillian, this "alphabet soup of sketches, riffs, and innovations" (Seattle Times) explores the various insanities of the modern world, "playfully bringing both familiar and wholly original scenarios to life" (Marie Claire). A Fall Books Preview Selection by Audible One of the Wall Street Journal's 15 Books to Read This Fall One of USA Today's Weekend Picks for Book Lovers One of People Magazine's Best New Books

Title: C Programming LanguageKeywords: C Programming, C Language, C Programming LanguageThis C Programming Language book is carefully formatted for kindle edition. Read on mac, pc, smart phone, tabs, fire, etc.This book is for absolute beginners with or without prior knowledge in programming, as this book uses Simple words, Short sentences, and Straightforward paragraphs. The triple S way of learning C language programming. The topics covered in this book includes brief introduction to C language, variables, data types, control structures, functions, pointers, and input and output stream to external files. This book starts its discussion from short history to installation of the needed software resource and a step by step screen shots of how to write C language code, compile and execute C programs. It presents graphical representation of algorithms for simpler learning. This book is packed with working and running C program samples and after reading this book, the reader would be able to develop and create C language programs based particularly from problems given in computer science courses, hence, adopting to other programming language will be a lot easier. This book is your first step in your programming career.Get your copy now while this book is on sale at \$3.44!Summary of Topics covered:Chapter 1 - Starting C Language ProgrammingReasons to use C LanguageBeginning to Program in C LanguageInstalling the Dev-C++Installing compiler for LinuxChapter 2 - Our First C Language Program The components of a C programWriting, compiling, and running our first program using Dev-C++ for Windows, and LinuxCorrecting errorsStatementsNull StatementsWhite spacesChapter 3 - Storing Data: Variables and Data Types in C LanguageVariable Declaration and definitionScope of variablesConstantsKeywordsConversion specifiers of data typesChapter 4 - Fundamentals of Input And Output in C LanguageDisplaying text on-screenLiteral text An escape sequence Accepting user inputChapter 5 - Arrays and Strings in C LanguageSingle-Dimensional Multi-Dimensional Array StringsDeclaring and defining a stringDefining a string using input functionsStrings' pre-defined functionsChapter 6 - Mathematical Operations in C LanguageExpressionsOperatorsAssignment Mathematical BinaryUnaryPrecedence level and parenthesesRelational Logical Type CastingPre-defined Mathematical FunctionsChapter 7 - Conditional Statements in C Languageif() statementSingle-alternativeDual-alternativeMultiple-alternativeNested if() statementThe switch() statementThings to consider in conditional statementChapter 8 - Looping Statements in C LanguageCounter-controlled loopfor() loop statementNested for() loop statementCondition-controlled loopPre-test loopPost-test loopThe Infinite LoopChapter 9 - User-Defined Functions in C LanguageUser-defined function , prototype, definitionCalling a user-defined functionThings to consider in functions:Chapter 10 - User-Defined Data Types in C LanguageStructuresDeclaring and Defining a structureAccessing MembersCompound declaration and definition of structureChapter 11 - Pointer in C LanguageUser-defined function , prototype, worksPointer ArithmeticChapter 12 - File Management in C LanguageFile management in CDefining and opening a fileClosing a FileReading and writing a fileputc() and getc() functionsprintf() and scanf() functionsDeleting a FileRenaming a FileEach chapter presents a Self-assessment questions.To GOD be all the glory!

"Major Jim Gant, a man seen by many of us as the 'perfect insurgent,'--an inspiring, gifted, courageous leader... -- GENERAL DAVID H. PETRAEUS (U.S. Army, Ret.) THE PAPER THAT ROCKED OSAMA BIN LADEN Team members during the May 2, 2011 U.S. military raid that killed Osama Bin Laden seized piles of Al Qaeda intelligence. One piece of evidence found in Bin Laden's personal sleeping quarters was an English language copy of Jim Gant's One Tribe at a Time. It contained notes in the margins consistent with others identified as written by Osama Bin Laden. A directive from Osama Bin Laden to his intelligence chief was also discovered. It identified Jim Gant by name as an impediment to Al Qaeda's operational objectives for eastern Afghanistan. Bin Laden ordered that Gant be assassinated. "[One Tribe at a Time] was hugely important...at a time when I was looking for ideas on Afghanistan...[Gant] was the first to write it down, in a very coherent fashion, very readable, very encouraging frankly...and there is enormous power in that." --General David H. Petraeus (U.S. Army, Ret.) quoted in American Spartan: The Promise, The Mission, and The Betrayal of Special Forces Major Jim Gant by Ann Scott Tyson Washington Post reporter Ann Scott Tyson read "One Tribe at a Time," and - informed by her combat experience in Afghanistan and Iraq and her eight years as a reporter in China - she realized that Jim's paper made sense. She decided to write a story about Jim entitled, "Jim Gant, the Green Beret who could win the war in Afghanistan." After the article appeared in January 2010, as Jim was in Washington, D.C., attending Pashto language training, he met Ann and the two fell in love. She followed his mission in Afghanistan and wrote AMERICAN SPARTAN: The Promise, the Mission, and the Betrayal of Special Forces Major Jim Gant.
