I, WOZ offers readers a unique glimpse into the offbeat and brilliant but ethical mind that conceived the Macintosh. After 25 years avoiding the public eye, Steve Wozniak reveals the full story of the Apple computer, from its conception to his views on the iconic cult status it has achieved today. In June 1975 Steve's curiosity and determination inspired him to build a computer, the first Apple. Six months later, he sold the machine, and for the self-professed 'engineer's engineer', success was imminent. But this story is full of life lessons, critical decisions, huge triumphs and big mistakes. Steve speaks also of his childhood, phone hacking pranks, working at Hewlett-Packard, the life-changing plane crash and teaching.

The high-tech wizard behind Apple offers a personal account of the creation of the first personal computer by marrying computer circuitry with a video screen and a typewriter keyboard to create the affordable, easy-to-use Apple I, detailing his life before and after Apple and providing a personal perspective on an invention that ignited the computer revolution. 50,000 first printing.

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Describes the development of the Apple Macintosh through a variety of anecdotes, photographs, and sketches.

Steve Wozniak grew up with an insatiable curiosity that his father, a programmer, helped fuel. After being accepted to the University of Colorado Boulder, Steve was quickly expelled for hacking into the college' computer system. He then got a job at Hewlett-Packard where he met Steve Jobs. Together, the two Steves created the Apple Computer company. Steve Wozniak's job at Apple was to program the computers to be programmable, compact, and fast, which was no easy feat when most computers at the time filled a room. Steve Jobs's role was to market and sell the new computers. Woz, as his friends called
