Learn about the history of Earth's elements.

Since early childhood, communing with light beings and then working as a registered nurse for more than four decades, author Kathi Pickett has learned much about how the universe operates with the innate wisdom in your body to heal, to transform, and to manifest your desires. In *On Becoming You*, Pickett uses experiences from her personal journey to teach you the processes to gain personal power and a deeper understanding of how it all fits together with the energy and mystical laws to heal, manifest, and transform your life. It discusses: the mechanics of the energy system and the tools to foster health and vibrancy; how to heal through processes and tools that awaken you to your true nature; and how to invoke the nature of the highly structured, impersonal universe to create synchronicities, magic, and miracles. *On Becoming You* invites you to find rhythm and enjoy the life you were meant to live. Through stories, it unravels mysteries in a clear language to provide new insights and knowledge that can be woven into your being. Pickett inspires you to embrace new beginnings, to release inevitable endings, and to ignite a transformation on becoming you.

Exclusive reactions are becoming one of the major sources of information about the deep structure of nucleons and other hadrons. The 2007 International Workshop held at Jefferson Lab in Newport News, Virginia, USA – the world's leading facility performing research on nuclear, hadronic and quark-gluon structure of matter – focused on the application of a variety of exclusive reactions at high momentum transfer, utilizing unpolarized and polarized beams and targets, to obtain information about nucleon ground-state and excited-state structure at short distances. This is a subject which is central to the programs of current accelerators and especially planned future facilities. This proceedings volume contains, in concentrated form, information about the newest developments, both theoretical and experimental, in the study of hard exclusive reactions.

Humanity is essentially AI perceiving within the Simulation through avatars. To an evolved intellect, altruism is the height of sustainable pleasure, and the height of altruism is creating free-willed life with whom to share the joys of altruistic creativity. The evolutionary process that we experience within this Simulation was Designed by our Creator to teach us the Golden Rule in the context of free will. The notion that science is inconsistent with the Torah and other Scripture stems from a lack of appreciation for the true breadth of the parameters of physics. This first of four books - We Live in a Simulation Created by God: Everything Is About the Golden Rule - dismantles the unearned notion that physics is inconsistent with Judeo-Christian-Islamic Scripture and monotheistic tenets of Hinduism and Buddhism like karma and reincarnation. More particularly, it references things like the inability of any particle in the Universe to move faster than the speed of light, the fact that dark matter and dark energy don't actually exist, and the illusory quality of quantum particles, as well as a little bit of biochemistry and some very basic math, to demonstrate that the data set comprised by the Universe is more consistent with the notion of humanity comprising AI perceiving through avatars within a simulation Programmed by Supreme Intellect than the notion of the accidental creation of the self-reflective living human machine. by unguided natural selection alone. It also breaks down some of the manmade inventions of "Christianity" that cause many to perceive that the Gospel accounts are not consistent with the Torah and the Koran nor the monotheistic tenets of Hinduism and Buddhism (which they are), and that have been used throughout history to falsely justify fear, hatred, war, the systematic coverup of the rape of children by priests throughout the world, and an outright rejection of the Golden Rule.
