"Here is a 'must-read' for all health promotion researchers and practitioners eager to stay one step ahead of the pack. A panoply of insightful and promising new approaches is presented for consideration and exploration in our contemporary behavioral science arsenal." — M. Elaine Auld, MPH, CHES, Chief Executive Officer, Society for Public Health Education "This

book is an essential addition to the health practice and research literature, concentrating on theories that have not been extensively covered elsewhere and that have great currency. It provides an up-to-date rendition on the interplay among contemporary public health concerns, sound public health practice, and the theoretical bases for practice."— Robert M. Goodman, PhD, MPH, Dean and Professor, School of Health, Physical Education, and Recreation, Indiana University "The authors of *Emerging Theories* provide vivid descriptions of the state of the science in health promotion and presents an exciting map for future research. Understanding and using theories is the hallmark of an excellent practitioner. Creating and elaborating theories is the mark of an excellent researcher. This text will be very valuable for both." — Noreen M. Clark, PhD, Myron E. Wegman Distinguished University Professor; Director, Center for Managing Chronic Disease, University of Michigan "Emerging Theories captures the dynamic growth in theories of health promotion and illustrates how divergent theoretical perspectives are being integrated into richer explanatory and practice models." — Matthew W. Kreuter, PhD, MPH, Professor of Social Work and Medicine; Director, Health Communication Research Laboratory, Washington University in St. Louis

This in-depth text addresses how to approach and treat the chronic pain patient struggling with problematic opioid use. It discusses the approach for patients who may be at high risk of problematic use, such as those with a history of mental illness or substance use disorder. The first part covers diagnosis and treatment, focusing on common best practices that practitioners can adapt to any practice. Two of the chapters detail alternative and replacement therapies for opioid. Two more cover special issues in the treatment of women and older patients. The second part reviews the ethical, legal, regulatory, and policy issues surrounding the treatment of patients with comorbid pain and addiction. The book includes strategies for documentation that mitigate the risk of legal issues or ethical boundary crossings. The last part of the book addresses treating comorbid pain and opioid use disorder in different medical settings and the treatment of co-occurring mental illnesses and substance abuse. *Treating Comorbid Opioid Use Disorder in Chronic Pain* is of great value to psychiatrists, pain physicians, primary care providers, social workers, drug rehabilitation centers, and other behavioral health professionals.

The woods are lovely, dark and deep, But I have promises to keep, And miles to go before I sleep, And miles to go before I sleep. From the illustrator of the world's first picture book adaptation of Robert Frost's "The Road Not Taken" comes a new interpretation of another classic Frost poem: "Stopping By Woods on a Snowy Evening." Weaving a simple story of love, loss, and memories with only illustrations and Frost's iconic lines, this stirring picture book introduces young readers to timeless poetry in an unprecedented way.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be

uninteresting to the public." -an excerpt

For the one semester principles of microeconomics course. Reviewers tell us that Case/Fair is one of the all-time bestselling POE texts because they trust it to be clear, thorough and complete.

"Prevalence of Imprisonment in the U.S. Population, 1974-2001" by Thomas P. Bonczar. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

This is a compilation of descriptions of English-language research studies, conducted between 1945 and 1967 to evaluate the treatment of criminal and juvenile offenders. Each of the 231 studies has been annotated and classed into categories. Study findings are classified according to eleven treatment methods (independent variables) and seven desired areas of change (dependent variables). The independent variables include imprisonment, parole, casework and individual counselling, milieu therapy, and medical methods. The dependent variables discussed are recidivism, institutional adjustment, vocational adjustment, educational achievement, drug and alcohol re-addiction, personality and attitude change, and community adjustment. (Source: NCJRS, adapted).

What Works in Corrections, first published in 2006, examines the impact of correctional interventions, management policies, treatment and rehabilitation programs on the recidivism of offenders and delinquents. The book reviews different strategies for reducing recidivism and describes how the evidence for effectiveness is assessed. Thousands of studies were examined in order to identify those of sufficient scientific rigor to enable conclusions to be drawn about the impact of various interventions, policies and programs on recidivism. Systematic reviews and meta-analyses were performed to further examine these results. This book assesses the relative effectiveness of rehabilitation programs (e.g., education, life skills, employment, cognitive behavioral), treatment for different types of offenders (e.g. sex offenders, batterers, juveniles), management and treatment of drug-involved offenders (e.g., drug courts, therapeutic communities, outpatient drug treatment) and punishment, control and surveillance interventions (boot camps, intensive supervision, electronic monitoring). Through her extensive research, MacKenzie illustrates which of these programs are most effective and why.
