This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. The much-anticipated fifth edition of Designing the User Interface provides a comprehensive, authoritative introduction to the dynamic field of human-computer interaction (HCI). Students and professionals learn practical principles and guidelines needed to develop high quality interface designs—ones that users can understand, predict, and control. It covers theoretical foundations, and design processes such as expert reviews and usability testing. Numerous examples of direct manipulation, menu selection, and form fill-in give readers an understanding of excellence in design The new edition provides updates on current HCI topics with balanced emphasis on mobile devices, Web, and desktop platforms. It addresses the profound changes brought by user-generated content of text, photo, music, and video and the raised expectations for compelling user experiences. Provides a broad survey of designing, implementing, managing, maintaining, training, and refining the user interface of interactive systems. Describes practical techniques and research-supported design guidelines for effective interface designs Covers both professional applications (e.g. CAD/CAM, air traffic control) and consumer examples (e.g. web services, e-government, mobile devices, cell phones, digital cameras, games, MP3 players) Delivers informative introductions to development methodologies, evaluation techniques, and user-interface building tools. Supported by an extensive array of current examples and figures illustrating good design principles and practices. Includes dynamic, full-color presentation throughout. Guides students who might be starting their first HCI design project Accompanied by a Companion Website with additional practice opportunities and informational resources for both students and professors.

This book presents and analyzes the concept of online brand communities, an emerging and exciting topic in marketing and eCommerce. First, it lays out the foundations like the evolution of the Web and the so-called Social Web, its utility for users and businesses, and the evolution of the marketing mind-set to adapt the Social Web. On this basis, the book then presents a detailed analysis of online brand communities, examining the concept of virtual community with a specific focus on virtual brand communities. In this context the book also explores recent trends related to branding and brand management. Next, it proposes a classification system for online brand communities, taking into account questions like the motivating factors for consumers to join, participate and stay in a community. The process of value creation in communities is examined from both business and consumer perspectives. The book draws to a close with a brief presentation of the process broadly accepted for the successful development of online brand communities.

This detailed description and analysis of Madagascar's Merina tribe and its ancient circumcision ritual is significant as a basis for the analysis of anthropological theories of ritual in general.

If you want to create your own game, but don't know where to start, this is the book for you. Whether you've used GameSalad before, or have prior game development experience or not you are sure to learn! Imaging software experience, such as Photoshop, is good to have, but art and assets are provided in the book's resources.

Book Description International Law Attorney, Elle Corday-Whitmire is Hot'lanta's newest and uncommonly amazing rainmaker, in more than one way. Her number one fan, husband U.S. Senator Harrison T. Whitmire, finds her intellectual and physical talents a total package. He's hypnotized by her charmed offerings; she gives "trophy wife" a new meaning. Getting to know Elle is to share in a complicated journey back into her bleak and gloomy Pulaski, Virginia childhood. Desperate to escape from her family's poverty, you'll witness her young ambition taking control to get what she wants. Elle lets nothing stand in her way. Her early sexual awakening and experimentation with her unexplored powers will shock you, as she transforms her ambitions into a promiscuous, turbulent excursion through her school days at Darlington and University of Georgia. Ultimately her entwined and knotted atrocities will electrify your senses and merge you with an underworld as can only be experienced by Elle and her unlikely partners in crime, the beautiful "Buckhead Madam," Roxanne Porter, and the exotic and talented prostitute, Noir. The chemical equation of these vixens and the mystery man out to get them will redefine southern justice and hospitality and lead Elle on a haunted and hedonistic journey that may end her world. Get ready to unleash your inner most erotic senses with this thrilling, captivating concoction of dirty little secrets, true love, murder and revenge. Adult content - consider yourself warned!

Do a little armchair time-travel, rub elbows with a four-dimensional intelligent life form, or stretch your mind to the furthest corner of an uncharted universe. With this astonishing guidebook, Surfing Through Hyperspace, you need not be a mathematician or an astrophysicist to explore the all-but-unfathomable concepts of hyperspace and higher-dimensional geometry. No subject in mathematics has intrigued both children and adults as much as the idea of a fourth dimension. Philosophers and parapsychologists have meditated on this mysterious space that no one can point to but may be all around us. Yet this extra dimension has a very real, practical value to mathematicians and physicists who use it every day in their calculations. In the tradition of Flatland, and with an infectious enthusiasm, Clifford Pickover tackles the problems inherent in our 3-D brains trying to visualize a 4-D world, muses on the religious implications of the existence of higher-dimensional consciousness, and urges all curious readers to venture into "the unexplored territory lying beyond the prison of the obvious." Pickover alternates sections that explain the science of hyperspace with sections that dramatize mind-expanding concepts through a fictional dialogue between two futuristic FBI agents who dabble in the fourth dimension as a matter of national security. This highly accessible and entertaining approach turns an intimidating subject into a scientific game open to all dreamers. Surfing Through Hyperspace concludes with a number of puzzles, computer experiments and formulas for further exploration, inviting readers to extend their minds across this inexhaustibly intriguing scientific terrain.

This second edition of the Nursing Outcomes Classification (NOC) contains 260 outcomes. Each outcome includes a label name; a definition; a set of indicators that describe specific patient, caregiver, family, or community states relted to the outcome; a 5point Likert-type measurment scale; and selected references used in the development of the outcome. Although we encourage the use of the indicators and measurement scale associated with the outcomes, the goal of the research team is to standardize the label name and definition for each outcome, which assist nurses in evaluating and quantifying patient status in relation to a particular outcome. Preface, p. XI

The Chaplin Cane explores the life and times of Calman Mencher, a mild mannered accountant who starts off his practice in an office located next to a "smelly deli" then rises up to become a successful businessman with his hands in several pots. Cal never mixes business with pleasure until he falls for beautiful Carole, an Oral Surgeon and a client. Fate intervenes and deflates the balloon of temptation, when he discovers a devastating truth. Even though Cal marries the lovely Ruth, he remains a mentor to Carole. Ultimately fate lends another hand, and Cal discovers his true self.
