aftermath of the Japanese attack on Pearl Harbor, a crack team of U.S. Navy salvage divers headed by Edward C. Raymer are hurriedly flown to Oahu from the mainland. The divers have been given a Herculean task: rescue the sailors and Marines trapped below, and resurrect the pride of the Pacific fleet. Now for the first time, the chief diver of the Pearl Harbor salvage operations, Cmdr. Edward C. Raymer, USN (Ret.), tells the whole story of the desperate attempts to save crewmembers caught inside their sinking ships. *Descent into Darkness* is the only book available that describes the raising and salvage operations of sunken battleships following the December 7th attack. Once Raymer and his crew of divers entered the interiors of the sunken shipwrecks—attempting untested and potentially deadly diving techniques—they experienced a world of total blackness, unable to see even the faceplates of their helmets. By memorizing the ships' blueprints and using their sense of touch, the divers groped their way hundreds of feet inside the sunken vessels to make repairs and salvage vital war material. The divers learned how to cope with such unseen dangers as falling objects, sharks, the eerie presence of floating human bodies, and the constant threat of Japanese attacks from above. Though many of these divers were killed or seriously injured during the wartime salvage operations, on the whole they had great success performing what seemed to be impossible jobs. Among their credits, Raymer's crew raised the sunken battleships USS West Virginia, USS Nevada, USS California. After Pearl Harbor they moved on to other crucial salvage work off Guadalcanal and the sites of other great sea battles.

possibly do to help? With compassion and clarity, David Miliband shows why we should care and how we can make a difference. He takes us from war zones in the Middle East to peaceful suburbs in America to explain the crisis and show what can be done, not just by governments with the power to change policy but by citizens with the urge to change lives. His innovative and practical call to action shows that the crisis need not overwhelm us. Miliband says this is a fight to uphold the best of human nature in the face of rhetoric and policy that humor the worst. He defends the international order built by western leaders out of the ashes of World War II, but says now is the time for reform. Describing his family story and drawing revealing lessons from his life in politics, David Miliband shows that if we fail refugees, then we betray our own history, values, and interests. The message is simple: rescue refugees and we rescue ourselves.

The true story of two doomed ships and a daring search-and-rescue operation that shines a light on the elite Coast Guard swimmers trained for the most dangerous ocean missions In late September 2015, Hurricane Joaquin swept past the Bahamas and swallowed a pair of cargo vessels in its destructive path: El Faro, a 790-foot American behemoth with a crew of thirty-three, and the Minouche, a 230-foot freighter with a dozen sailors aboard. From the parallel stories of these ships and their final journeys, Tristram Korten weaves a remarkable tale of two veteran sea captains from very different worlds, the harrowing ordeals of their desperate crews, and the Coast Guard ’ s extraordinary battle against a storm that defied prediction. When the Coast Guard received word from Captain Renelo Gelera that the Minouche was taking on water on the night of October 1, the servicemen on duty helicoptered through Joaquin to the sinking ship. Rescue swimmer Ben Cournia dropped into the sea—in the middle of a raging tropical cyclone, in the dark—and churned through the monstrous swells, loading survivors into a rescue basket dangling from the helicopter as its pilot struggled against the tempest. With pulsating narrative skill in the tradition of Sebastian Junger and Jon Krakauer, Korten recounts the heroic efforts by Cournia and his fellow guardsmen to haul the Minouche ’ s crew to safety. Tragically, things would not go as well for Captain Michael Davidson and El Faro. Despite exhaustive searching by her would-be rescuers, the loss of the vessel became the largest U.S. maritime disaster in decades. As Korten narrates
