Most young drivers have one goal in mind when they think of getting their own vehicle: freedom. Car ownership is one of life's joys as well as one of its major financial investments. This candid volume offers readers a step-by-step approach for how to choose the best car to suit their needs and how best to plan, research, and budget for the purchase. In today's economically challenging times, students require an opportunity to learn about money management as well as car facts, the choices available, and the importance of safety. Content supports state and national standards on financial literacy.

Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters.

This thesis is concerned with the development of interactive systems for smart environments. One of the characteristic of smart environments is the need to support different interaction paradigms at runtime. On the one hand interaction is performed explicitly: the user performs an action in order to interact with the system (e.g., pressing a button to adjust the light). On the other hand actions of the user are interpreted by the smart environment, even though they have not been performed primarily to interact with the system: implicit interactions (e.g., walking to the speaker's desk to give a talk). A smart environment tries to infer those interactions to assist the user in her work (e.g., display slides at the projection canvas). Both interaction paradigms originate from different research fields and are currently treated independently although implicit and explicit interaction mutually influence each other and occur interleaved. The thesis introduces a task modeling language in order to cope with the given requirements of smart environments which can be used to perform interaction development for smart environments in a model-based fashion for both interaction paradigms.

What is the "American Dream"? This book's author argues that contrary to what many believe, it is not achieving the wealth necessary to enter the top one percent but rather becoming members of the great middle class by dint of hard work and self-discipline.
• Includes content related to all the themes of the National Curriculum Standards for Social Studies and the Common Core requirements for primary documents and critical thinking exercises
• Focuses on the intersections of middle class society to current issues of interest and policy debates, including diversity, gender, taxation, race, minimum wage, unions, student loan interest rates, school closings, and labor issues
• Documents the perspectives of the major economists of each era on the middle class

Compelling High-Tech Drama and International Intrigue! In Frank Camelio ' s gripping new thriller Savior, Swiss geneticist Joshua Mason has made a discovery that promises good health and long life for all humanity. He wants everyone inoculated with his special serum - but on his terms only. Mason is also concealing the serum's full impact on humans and taking extravagant measures to hide his past. Meanwhile, the Supreme Trust, a clandestine international cabal, is funding its own genetic research with the purpose of controlling global population and demographics. As Mason and the Trust move separately and secretly to shape the future, their plans collide, prompting an investigation by the U.S. National Security Agency. The conflict entangles American geneticist Joyce Ching, historian Jim Rogers, and National Security agent Laura Andrews, who face mortal dangers in pursuit of the truth. As the three begin to comprehend the magnitude of Mason ' s findings and the Trust's grand strategy, shocking revelations surface - disclosures that alter history and foreshadow a precarious future. Whichever future prevails, Savior will make readers ask themselves, " Given the choice, would I take Mason ' s serum?"
